Correction to: On the equivalence of conglomerability and disintegrability for unbounded random variables

Mark J. Schervish[1] · Teddy Seidenfeld[1,2] · Joseph B. Kadane[1]

The authors have discovered an incorrect statement:

On page 503 the sentence "If (2) holds, we say that P fails to be disintegrable in the partition π." which appears immediately after Eq. (2) is false. Fortunately, the
