

be achieved in many other areas through use of these human techniques.

ACKNOWLEDGMENTS

was supported in part by Public Health Service Grants MH 22610 and MH 26002 from the National Institute of Mental Health. Preparation of this chapter was supported in part by Grant BMS 20514. We wish to thank John Carroll, David Klaf, and John helpful comments on the manuscript. The authors also wish to thank Susan Judy Jewett, and Barbara Ruggles for their assistance in running subjects and in the studies reported here.

 book is the  
 have this  
 to make

may recall, ends like this (Asbjørnsen & Moe, 1957):

"Now, I'm coming to gobble you up!" roared the Troll [to the biggest Billy Goat of all].  
 "Well, come along!" [said Billy Goat]. "I've got two spears,  
 And I'll poke your eye balls out at your ears.  
 I've got besides two great big stones,  
 And I'll crush you to bits, body and bones." [p. 25]

That is what the Billy Goat said, and that was what he did. He finished off the Troll, and tossed him into the river. Of course, that was just a fable.
